

Andrew Turk, M.D.

Dr. Andrew Turk understands that choosing a plastic surgeon is a serious decision. To ensure their safety and increase the likelihood of a positive outcome, patients should look for a provider with the training and certifications to match their needs. Dr. Turk is certified by the American Board of Plastic Surgery, the only board under the American Board of Medical Specialties that certifies plastic surgeons.

Specializing in face and body cosmetic procedures, Dr. Turk has access to the latest trends and technology through his membership in professional societies and his academic and hospital appointments. His practice, Naples Cosmetic Surgery Center, is centrally located on the campus of Physicians Regional Medical Center in Naples. Accredited by the American Association for the Accreditation of Ambulatory Surgery Facilities, it is the only plastic surgery suite located inside of a hospital in Naples.

Dr. Turk offers a variety of state-of-the-art services that give patients a natural, rested, fresh look. Among his latest treatments are facelift procedures using a combination of fat transfers, fillers and surgery; hand rejuvenation utilizing fat grafting, dermal fillers, peels and lasers; and ultrasound-assisted liposuction that uses ultrasound energy to liquefy fat for a smoother removal process. For breast augmentations, newer generation, FDA-approved silicone implants give patients a softer, more natural look than implants of the past.

The Vectra 3D imaging system allows Dr. Turk to help patients accurately visualize the results of their procedure before committing to surgery. The program uses three-dimensional photographs of the targeted area to create lifelike models to simulate the actual results that can be achieved through cosmetic surgery procedures.

The addition of TouchMD to his practice allows patients to review their consultation and photos in the privacy of their home. Naples Cosmetic Surgery Center strives to exceed patients' expectations, truly believing that their surgical experience is just as important as the results.
